Durham College	
Course	**INFT1101: Wireless Network Security**
Professor	**Nargis Khan**
Lab#4	**Scanning Nearby wifi networks and cracking WPA2 using Airodump-ng-(Part1)**

IT IS NECESSARY TO HAND IN THE FOLLOWING PAGES ONLY (No instructions pages please)

Student Name	Melvin Viado
Performed Date	October 2nd, 2025

1. Write the commands to active Alfa card to monitor mode.

Output#6:
sudo airmon-ng start wlan0 if there are interfering processes: *sudo airmon-ng check kill*

2. Why do need to set the Alfa card to “Monitor” mode?

Output#7:
ALFA cards by default are in a regular Wi-Fi connection mode and will not monitor the network.

3. What are the potential risks of using the aireplay-ng deauthentication attack on a real network? How could this impact the network and its users? Explain it very briefly.

Output#8:
The deauthentication attack will temporarily or permanently deny service and disconnect devices from the wireless network. This is not allow users to access resources on the internet and, especially in a work environment, can be bad for productivity purposes.

Marking Scheme

Output 1 to 5	4	3	2	1	0
Output 6				1	0
Output 7			2	1	0
Output 8			2	1	0
Only submission pages included				1	0
Total:					/10
