EDUCATION

Durham College

Computer Programming & Analysis

Oshawa, ON

Sep 2022 – Apr 2025

Durham College

Cybersecurity

Oshawa, ON

Sep 2025 – Apr 2026

EXPERIENCE

Cybersecurity Intern

SecureTech Solutions Inc.

May 2026 - Aug 2026

Toronto, ON

- Monitored and analyzed over 2500 security alerts using Splunk SIEM, contributing to the identification of over 15+ potential threats, with a 95% accuracy rate in initial triage
- Conducted vulnerability scans on 200+ endpoints using Nessus, identifying and categorizing 60+ critical vulnerabilities, leading to a 40% reduction in risk exposure
- Assisted in 10 incident response cases, reducing average resolution time from 6 hours to 4 hours through improved documentation and escalation procedures
- Developed 5 PowerShell scripts that automated daily log reviews and system health checks, saving approximately 10 hours/week in manual effort

IT Security Support Assistant

Durham College IT Services

Sep 2026 - Apr 2027

Oshawa, ON

- Provided technical support for 300+ endpoints using CrowdStrike and Windows Defender ATP, contributing to a 98% malware detection rate
- Performed monthly audits of user access controls across 5 departments, identifying and resolving 25+ access anomalies to ensure compliance with RBAC policies
- Analyzed network traffic using Wireshark, detecting and mitigating 12 instances of suspicious activity, including unauthorized port scans and DNS tunneling attempts
- Authored 3 internal security guides and trained 50+ staff members, improving security awareness scores by 30% in post-training assessments

Junior Security Analyst

CyberGuard Analytics

May 2027 – July 2027

Mississauga, ON

- Contributed to threat intelligence efforts by mapping 20+ attack patterns using the MITRE ATT&CK framework, enhancing detection capabilities in SIEM rules
- Deployed and configured OpenVAS to scan 150+ internal systems, identifying 70+ vulnerabilities, with remediation plans implemented for 85% within 30 days
- Participated in 3 simulated cyberattack exercises, helping reduce response time by 35% and improving team coordination during incident handling
- Updated and standardized ISO/IEC 27001 documentation across 4 departments, improving audit readiness and reducing non-compliance findings by 50%

PROJECTS

Network Threat Detection Dashboard | *Python, Splunk, MITRE ATT&CK, Pandas*

Aug. 2027 - Jan 2028

- Developed a real-time dashboard using Python and Splunk API to visualize and categorize over 5,000 security events across a simulated enterprise network
- Integrated MITRE ATT&CK mapping to classify threats, improving detection accuracy by 35% during red team simulations
- Automated log parsing and anomaly detection using Pandas, reducing manual analysis time by 60%

TECHNICAL SKILLS

Security Tools: Splunk, IBM QRadar, CrowdStrike, Nessus, Wireshark, Zeek, OpenVAS

Operating Systems: Windows Server, Linux (Ubuntu, Kali), macOS, PowerShell, Bash

Languages: Python, SQL, JavaScript

Frameworks: NIST CSF, MITRE ATT&CK, OWASP, ISO/IEC 27001
