Incident Handling and Response – MGMT1212
Assignment 2 - BIA

Instructions

- Turn in your completed assignment through DC Connect. It is your responsibility to verify that the assignment was properly submitted through DC Connect by the deadline published on DC Connect. This is an individual, not a group, assignment!
- Note that unless otherwise specified, all textbook references are to Principles of Incident Response and Disaster Recovery (second edition).
- Please ensure you are familiar with the course policy on academic integrity. This assignment is to be completed and written up individually. If you discuss the assignment with others, you must cite them for each question discussed.
- Watch your spelling and grammar; you will lose marks for spelling and grammar mistakes.
- Make sure you follow the length guidelines provided - there will be a grade penalty for your answers being longer than these guidelines (up to 50%). Note that all guidelines assume single spacing and 12 point font.

- 1- Assume that you have been hired by a small to medium organization to help them prepare a contingency planning document. You may choose any organization (or practice). Some examples are: clinic, veterinary practice, credit union, tax preparation office, event management company, accounting firm, real state agency, etc... (Please **DO NOT** use an ISP as your organization)
- 2- To help with the preparation of the business contingency document, you conduct a Business Impact Analysis (BIA), following the BIA three stages:
 1. Stage 1: Assessing mission critical /business processes and recovery criticality (limit the number of business processes to **5 only**).
 2. Out of the list in the previous step, choose **2** business missions that are related to information technology and information security.
 3. Stage 2: Identifying resource requirements per mission process.
 4. Stage 3: Identifying recovery priorities per mission process.
- 3- Use NIST SP800-34-Rev1-BIA-Template to prepare the BIA . The template file is provided with this assignment, and available at https://csrc.nist.gov/CSRC/media/Publications/sp/800-34/rev-1/final/documents/sp800-34-rev1_bia_template.docx).
- 4- Your completed BIA should not exceed 6 pages.
